2021 = (same as 2020 + HPD reports from neighbors against him, harassment "14 DAY NOTICE" + "court notices / warrant notices")

2022 = October 17, 2022, out of nowhere, he ordered a warrant of eviction with improperly served sheriff list of inventory while I was out of town for the 1st time since moving in there. I went to Philadelphia for my autism medical paperwork since childhood AND to perform my home coming of PHILAMOCA (a well known venue). Apparently there was a notice of court appearance that I did not receive but my 501c3 secretary was there protecting the place from EXACTLY THIS HAPPENING; she was arrested and released 24 hours later. I got back into the apartment the same night with help from activist lawyers and was there until October 23, 2022 when the landlord illegally paid the police to evict me, a 501c3 with 420a status that he was state obligated to accept as my housing voucher. He had the police remove me again and changed ALL the locks in the building including the front ones, but NOT the USPS lock... somehow! So now it is December 21, 2022 and I am still addressless, with court on January 11, 2023 dropping the case from a felony of burglary (he didn't even have my professional gear on the list because it was with me in Philadelphia doing the benefit awareness event).
